EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

A typographical error was found in the specification. The application has been amended as follows:

Page 1, line 6, replace "0=x, 0=y, x+y=1" with $-0 \le x$, $0 \le y$, $x+y \le 1-$.

REASONS for ALLOWANCE

The following is an examiner's statement of reasons for allowance:

A close prior art, Koike et al. (U.S. Patent No. 5945689), discloses most of the limitations of the claims, but fails to show at least the first nitride semiconductor layer has a higher band gap energy and a smaller concentration of the n-type impurity than the second nitride semiconductor layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 10/601,582

Art Unit: 2815

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Ishikawa et al. (illustrates a compound semiconductor device with different concentrations, but not nitride semiconductor layers) and Udagawa (illustrates a LED with different concentrations, but a layer priority).
